11kw Nicolini motor
24amps
3 PHASE MACHINE

MACHINE QUALITIES

- 11kw Nicolini (Italian) motor – double flange, totally enclosed fan cooled motor with black epoxy power coated finish to combat environmental corrosion. Soft coupling mechanism connection to drive motor and pump for increased longevity.
- Slow revving 1450rpm
- High quality interpump pump – it is triplex ceramic piston plunger pump, complete with stainless steel valves and solid brass forged nickel plated head with oil induction sight glass.
- "ZERO" line pressure solid brass adjustable unloader valve for increased safety and servicability
- Auto Stop/Start mechanism increasing the ease of operation of the machine and its longevity.
- Stainless steel high quality pressure gauge with glycerine.

- Industrial strength fully welded frame in STAINLESS STEEL!
- Built with only recognized high quality components supported by world-wide spare parts back-up
- High pressure hose and quick release coupling system
- 3 meter long power supply lead
- Motor protection by thermal overload
- Inlet water filter
- Complete operator and maintenance manuals
- EASY TO SERVICE AND MAINTAIN
- Auto Stop/Start Mechanism (only one on the market today) Machine shuts down after a short time of no use to protect the internals and when you need to restart it you simply pull the trigger and the machine starts up again automatically)
